

Successful shipping is defined as getting your parcel from Point A to Point B...  
on time, and for the best price

## Sound Simple?

*rethink how you ink.™*

Easy Group is an imaging consumables provider offering ink and toner cartridges and refills for business and end users and operates a number of ecommerce properties such as [www.123refills.net](http://www.123refills.net). Orders are shipped to the US and other countries, and shipping options include both expedited delivery (1 day, 2 day, 3 day guaranteed services) as well as ground shipping and international options. Making the best possible shipping decision for both the customer and the company is critical to ensure efficiency and cost control, and Enroute has proved to be the best overall shipping solution owing to its flexibility, comprehensiveness and insight that it offers into our shipping costs and behavior.

As a customer of Enroute, I highly recommend their shipping platform for many reasons. Not only is their management and leadership exemplary, but the quality of their service and product is unparalleled when comparing them to other shipping solution providers that we have tested of the years. Enroute's system is flexible and allows our company to adapt to new shipping options quickly and on demand, and it also gives us valuable insight into our shipping costs and behavior, information which has proved very valuable in terms of helping us identify cost cutting opportunities and billing errors made by our shipping vendors. I believe that Enroute more than pays for itself, and I look forward to their future growth and enhancement, which in turn helps customers like us be more efficient at shipping. They are genuinely true to their motto of giving "power to the business that ships".

Sincerely,  
Dr. Dimitris Constantinou
